noSql

HTML

CSS

## PERSONAL PROJECTS

Social Media App(API's) (06/2023 - 06/2023) [🔗](#)

- In this project we make all the api like Onboarding, CRUD(like, comments, upload post).
- One to one chat using socket.io and send OTP using Nodemailer (SSL or TLS).

Scrapping IPL 2023 (07/2023 - 07/2023) [🔗](#)

- In this project we can get all the details of Match (Venue, Date, Teams, Results)with the help of Cheerio Module.
- Store the match details into Excel sheet.

Hacker Rank code submission (09/2022 - 11/2022)

- It's particularly useful for scenarios where you need to perform repetitive actions on web pages.
- **Puppeteer** is a Node.js library Module developed by Google that allows you to control and automate headless Chrome.

File Organizer (08/2022 - 09/2022) [🔗](#)

- In witch we can organize our folder structure like Download (pdf, video,exc,zip, etc) into separated folder to basis of file extension.

## CERTIFICATES
